TI is a global semiconductor company and the world's leading designer and supplier of analog and embedded processing technologies. Our fundamental commitment is to support customers' ideas so they can create new electronic systems that make the world smarter, healthier, safer, greener and more fun.

If you want to be part of an open-minded environment that provides great rewards for great work and offers high levels of responsibility early on, look no further and jumpstart your career after graduating!

Start your career today with TI's

Eastern European Graduate Program

How we develop our next generation leaders:

- As a participant in the Eastern Europe Graduate Program (EEGP), you will have the opportunity to gain valuable product, business and customer knowledge.
- You will benefit from a strong training curriculum during a 1-1,5 year assignment in the US (Dallas and other locations). This assignment will help broaden your horizon in many different areas, help you get a better understanding of TI and its culture and be close to customers as well as the TI Business Units in the US.
- In your final role as a Business Engineer, you will be responsible for establishing and maintaining long-term customer relationship in order to identify new business opportunities and drive growth in your region.

What it takes to join the EEGP:

- Completed studies in electrical or business engineering
- Desire to be the interface between customers and TI's technical experts.
- Passion to explore the business side of the technology industry.
- Fluent English language skills and local language skills, depending on the final location.
- Ability to think outside the box and willingness to drive ideas forward.
- Flexibility to relocate to a variety of different TI sales offices in or near major cities in your home country after the program.

Innovate. Create. Make the difference.
