

OSIsoft® LLC delivers the PI System, the industry standard in managing time series data and events. We build software that puts process data in front of smart people so they can make smart decisions.

Founded in 1980, OSIsoft, LLC is headquartered in the United States with currently 27 worldwide locations. If stability, growth and challenge are important to you then OSIsoft is the place!

We are passionate about our work and want to share that passion with you.

Our team in the Czech Republic has an immediate need for a:

### Interface Developers (m/f)

Launch your career by joining OSIsoft, a community of professionals developing critical software infrastructure around the world.

Your assignment will begin with an Orientation Program. During this time you will receive in-depth classroom training on our core products. This training will take place at our offices in Frankfurt (Germany) and San Leandro (California, U.S.). At the completion of the Orientation Program you will begin your career by joining the development team in our CZ office (Ostrava). You will work closely with an assigned mentor who will guide and support you during your initial phase within our organization.

#### Your responsibilities include:

- Design, implement, document and test software interfaces that will connect to OSIsoft's product, the PI System
- Support and maintenance of developed software products
- Assist the Technical Support team by providing support to our customers
- Create and present product presentations at User Conferences, trade shows and seminars
- Support strategic sales pursuits

#### Preferred skills:

- Demonstrated programming experience in C/C++ programming language
- Proficiency in at least one Microsoft.NET programming language (preferably C#)
- Excellent communication skills (verbal and written)
- Analytical and problem solving skills

#### Requirements:

- Bachelor, Master or PhD/Dr. in any of the following disciplines: Chemical, Electrical or Mechanical Engineering, Computer Science or Natural Sciences (Mathematicians, Physicists)
- Experience working with computers and developing software applications in the Windows environment
- Fluent in English (oral and written)
- Ability to travel within Europe and the United States

#### Pluses:

- Experience in real-time systems, communication protocols and interface standards
- Russian language skills

If you have demonstrated academic success by completing a Bachelor's Degree, Master's Degree or PhD/Dr. in the referenced disciplines we would like to talk to you.

Submit your resume at <https://home.eease.com/recruit/?id=359743> to become a key ingredient to the makers of the PI System™.
