

Are you good at Finding solutions?

Become a Supply Chain Graduate with the LEGO Group and build your future with one of the strongest brands in the world.

The Supply Chain Graduate Program is a program within the LEGO Global Supply Chain business area. Over a course of 18 months, eight candidates will learn the complexity of our business, gain hands-on responsibility, and be prepared for future leadership within the LEGO Group.

Hands-on responsibility from day one

As a Supply Chain Graduate with the LEGO Group, your skills and competencies will be put to the test on real projects where you will gain exposure to a wide range of LEGO Global Supply Chain operations, working as both a team member and team leader on different assignments. At an early stage, you are given responsibility of business critical processes where you will experience different phases of projects and operations ranging from procurement, planning, manufacturing, quality, and engineering to logistics.

Steep learning curve

In addition to gaining practical experience, you will engage in team trainings that will focus on business strategy, project management, and personal leadership. The program is structured to ensure that you are consistently challenged. In short, we offer you a steep learning curve.

A global workplace and career path

As a Supply Chain Graduate, you will be stationed abroad at least once as a part of your three rotations with six-month durations. The LEGO Global Supply Chain has locations in Czech Republic, Hungary, United States, Mexico, Hong Kong, China, and Denmark. You will experience the benefits, but also the challenges of working in an international environment with different cultures. In addition, you will be challenged on your ability to navigate in an organization where many different functions are dependent on each other.

Skilled, high-performing graduates wanted

We seek only the best. That means people who can hit the ground running and who are excited by the opportunity to collaborate in real projects from the beginning. You hold a strong academic profile within chemical, mechanical, electrical, production or engineering. High performing graduates with a strong business profile within supply chain management, operation management, project management or planning are also eligible for the Supply Chain Graduate Program.

Requirements:

- You have obtained your master's degree within the last year.
- You have the right mindset: ambitious, proactive, confident, positive, and open-minded.
- You have an international outlook and the ability to work in different cultures and challenging environments. Excellent communication skills and fluency in English are mandatory.

Application and contact

Please submit your application marked LEGO Supply Chain Graduate Program via [this link](#)

Please attach your CV and your academic certificates from your master's degree and any other courses at a similar level. If you have not yet completed your master's degree at the time of application, please attach your bachelor's (B.Sc.) certificates and, if possible, an overview of your latest exam marks.

Deadline for applications is 7 March, 2011

The program begins 1 September 2011.
